

Press release 2017-02-07

Biotech AB to the next level – Einar Pontén new Chairman of the Board of Directors

Biotech AB has appointed Dr Einar Pontén as a new Chairman of the Board of Directors, effective from today.

Einar Pontén has previously been CEO of SeQuant AB and Merck SeQuant AB. SeQuant had its operations in Umeå, Sweden and successfully introduced unique products for chromatography widely used in areas such as life sciences. The company was acquired by the German chemical and pharmaceutical group Merck KGaA in 2008.

Einar has worked within the current AstraZeneca and he received his PhD at Umeå University. In recent years he has worked as a business developer and coach to academic start-up companies, and he is a member of the board of Spinchem AB, Ecaconsortium A/S and CEO of Lipum AB.

"We are very pleased to recruit such an experienced force as Biotech AB currently is in an exciting development phase with strong organic growth and many new unique products in pipeline", says the former Chairman of the Board Ralf Jutvik. "Speaking for myself I will continue as a member of the board and support our team" Ralf continues.

Einar Pontén comments his new position: "Biotech has an excellent reputation of being support oriented and dedicated to customers' success. We will continue in that direction"
